## DETAILED ACTION

### *Election/Restriction*

1. Applicant's election with traverse of claims 1-17 in Paper No. 7 is acknowledged. The traversal is on the ground(s) that the Examiner has not properly pointed out why the two inventions could not be considered together. This is not found persuasive because the area of search for claims 18-20 is not under the Examiner's classification area.

The requirement is still deemed proper and is therefore made FINAL.

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-17 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-43 of U.S. Patent No. 6,066,512. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of application 09/615,503 show a method for fabricating a device. Similarly, from U.S. Patent No. 6,066,512, a semiconductor device, a method for fabricating, and an electronic apparatus is shown. Thus it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide fabrication of microelectronic circuit components to improve microminiaturization of semiconductor devices.

### *Conclusion*

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
